Amendments to the Claims:

Claims 1 – 13 (Canceled)

14. (Currently Amended) A portable device comprising:
a user input comprising a key having a first function of performing a shortcut to a predetermined menu when the device is in a first state and a second function when the device is not in the first state;
a processor for determining the state of the device and for performing a function in response to a first mode of operation of the key; and
wherein the second function is ~~a change of state of the device performing a shortcut~~ to the first state, and the predetermined menu comprises a list of first level menu items.

15. (Previously Presented) A device as claimed in claim 14, wherein the first state is an idle state.

Claims 16 – 19 (Canceled)

20. (Previously Presented) A device as claimed in claim 14, wherein the first level menu items include at least one item selected from profiles, call register, messages, infrared, calendar, calculator, games, call divert, settings.

Claims 21 – 22 (Canceled)

23. (Previously Presented) A device as claimed in claim 14, wherein the key has a third function and the processor performs the third function in response to a second mode of operation of the key.

24. (Previously Presented) A device as claimed in claim 23, wherein;
the third function is associated with a second state of the device;
the key has a fourth function associated with a third state of the device; and
the processor performs third or fourth functions in response to the second mode of
operation of the key, depending upon a state of the device.
25. (Previously Presented) A device as claimed in claim 23, wherein the processor
determines the mode of operation of the key by a duration of operation.
26. (Previously Presented) A device as claimed in claim 24, wherein the processor
determines the mode of operation of the key by a duration of operation.
27. (Previously Presented) A device as claimed in claim 25, wherein the first mode
of operation has a duration less than a predetermined threshold.
28. (Previously Presented) A device as claimed in claim 26, wherein the first mode
of operation has a duration less than a predetermined threshold.
29. (Previously Presented) A device as claimed in claim 14, wherein the key is a
button.
30. (Previously Presented) A device as claimed in claim 14, wherein one of the
functions of the key is to turn off the device.
31. (Previously Presented) A device as claimed in claim 14, which is a
radiotelephone.

32. (Previously Presented) A device as claimed in claim 14, wherein the key has a third function and the processor performs the third function in response to a second mode of operation of the key.

33. (Previously Presented) A device as claimed in claim 15, wherein the key has a third function and the processor performs the third function in response to a second mode of operation of the key.

34. (Previously Presented) A device as claimed in claim 15, wherein the first level menu items include at least one item selected from profiles, call register, messages, infrared, calendar, calculator, games, call divert, settings.

35. (Previously Presented) A device as claimed in any preceding claim wherein the key is provided by a position of a multi-positional device.

36. (Previously Presented) A device as claimed in claim 25, wherein the multi-positional device is a rocker, roller or joystick.

37. (Currently Amended) A method of operating a portable device comprising:
actuating a user input comprising a key having a first function of performing a shortcut to a predetermined menu when the device is in a first state, actuating the user input when the device is not in the first state, the key having a second function when the device is not in the first state;
one of the first function and the second function being performed in response to a first mode of operation of the key and upon determining the state of the device; and
wherein the second function of the user input is ~~a change of state of the device~~
performing a shortcut to the first state, and the predetermined menu comprises a list of first level menu items.

38. (Currently Amended) A computer program comprising program instructions for operation of a portable device and when loaded onto a processor, causing the processor to perform the steps of:

detecting actuation of a user input comprising a key having a first function of performing a shortcut to a predetermined menu when the device is in a first state and a second function when the device is not in the first state;

determining the state of the device;

selecting one of the first function and the second function in accordance with the determined state of the device, and

performing the selected function in response to a first mode of operation of the key; and

wherein the second function of the user is input is ~~a change of state of the device~~

performing a shortcut to the first state, and the predetermined menu comprises a list of first level menu items.

39. (Previously Presented) A physical entity embodying the computer program as claimed in claim 38.

40. (Previously Presented) An electromagnetic carrier signal carrying the computer program as claimed in claim 38.
